

NSAC Engineering Department Open House

Nov. 13, 2008
5 p.m. - 8 p.m.
Banting Building

Nova Scotia Agricultural College's Engineering Department would be honoured to have you as a guest at our annual Open House. This is an opportunity for prospective students and the public to come and tour our facilities, see our new building renovations and learn about our programs through our faculty and staff members.

Engineering Department Degrees & Diplomas

- Engineering Diploma
- B.Sc. Bio-Environmental Systems Management
- Bachelor of Technology in Applied Science

Department Research

In the Engineering Department, our faculty and master students are continually conducting research projects in the areas of precision agriculture, environmental and bio systems. We will be showcasing components of these projects during Open House.

- Blueberry Field Mapping System (precision agriculture)
- Computer Vision Demonstrations
 - Automated fruit/berry inspection
 - Motion Measurement Apparatus
 - Thermo Vision
- Nanotech Food Processing technologies
- Composting
